### Product description

This is a foaming product with a pleasant cherry aroma. It comes in three colours: red, blue and yellow. The three colours are used together for tricolour foam application.

### Storage

Keep tightly closed, avoiding exposure to UV rays and extreme temperatures.  
For more information, we recommend referring to the safety sheet.

Product designed for:

A dosing pump is used to apply the product in high-pressure Jet washes. The recommended dosing rate for hard water (400 ppm) is around 20 mL/min, trying to keep the pump at a percentage of between 25 and 30%. The flow of chemical product can be reduced slightly to around 18 mL/min when using soft water.

25-30%  
High-pressure pump

In car wash tunnels and rollovers, the product is dosed by means of a dosing pump. For hard water (400ppm) a dosing rate of around 20 mL/min is recommended, trying to keep the percentage of the pump between 25-30%. The flow of chemical product can be reduced slightly to around 18 mL/min when using soft water.

25-30%  
Bay and tunnel pump
